Description

Insula® is a ceiling concept made of a white pre enamelled frame with a 76 mm height integrating a Eurocoustic ceiling panel. Being an independent frame, it is possible to create new volumes and spaces, to delimit, individualize and emphasize specific zones.

Framework module sizes

Length	1200 mm	2400 mm
Width	1200 mm	1200 mm
Weight	8,65 kg	13,65 kg

Consult us for other sizes.

Panel module sizes

Filling panels can be chosen from the Eurocoustic range.

Length	600 mm and 1200 mm
Width	600 mm
Weight	20/25 mm
Edge	A (right) and E (rebated)

Patterns

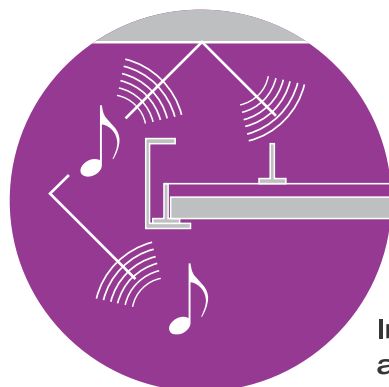

The range of Eurocoustic colors, patterns, finishes and edges provides Insula® islands with a large choice of decorative possibilities: Atrium®, Tonga®, Vega®, Altes®, Equation®, Hermes®, Samoa®, Quartette® ...

Acoustic absorption

Because of an enhanced absorption, Insula® provides controlled reverberation, facilitates understanding and ensures acoustic comfort in premises of the tertiary sector dedicated in particular to education and communication.

Direct absorption

Indirect absorption

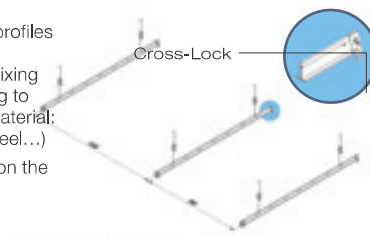

Installation - Kit 2400 x 1200 mm

Standard kit including Grid + frames + accessories (choose fixing elements according to the nature of the load bearing structure, wood, concrete, steel...)
